Optimum Solutions

If you have a special requirement, be it for a single mould or a full production plant, talk to us at Coote Engineering and we will engineer a solution which meets all your specific needs.

Coote Engineering Ltd. have been designing and manufacturing moulds and machinery for the Precast Concrete Industry since 1977. With this wealth of experience Coote can offer its customers the optimum solutions for their precast manufacturing requirements.

Coote Engineering utilise CAD design coupled with CNC manufacturing facilities to ensure that our products, whether from a standard range or custom design, are always manufactured to the highest of standards.
